

# Signature™ 7SE

## Wallmount speaker

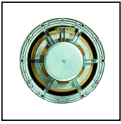

### Product Summary

- The Signature 7SE is a true audiophile in-wall monitor. The baffle incorporates a rigid zinc alloy mid/bass driver chassis for speed and impact and the tweeter has a powerful neodymium magnet. The crossover components are audiophile-type polypropylene capacitors, which produce smooth transition throughout the frequency range.

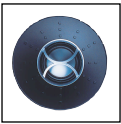

### Technical highlights

**Kevlar®:** B&W developed and patented the method of using Kevlar® for loudspeaker cones to reduce unwanted standing waves. DuPont originally created Kevlar® for use in bulletproof vests.

**Bass/Mid-range unit:** Many of the bass/mid-range drive units in the B&W custom installation speaker systems use cast chassis. The extra rigidity they display over the more common press steel chassis improves bass 'speed' and 'impact'.

**Aluminium Tweeters:** Anodised aluminium dome tweeters are used on all but the smallest models. These are protected by a stylish, low-diffraction ring. This ring ensures that the clear, undistorted treble produced by the dome, leaves the speaker undisturbed.

<b>Drive units</b>	1 x 25mm metal dome high-frequency 1 x 180mm Kevlar® mid/bass	<b>Dimensions</b>	Frame size Height: 373mm Width: 285mm
<b>Frequency response</b>	40Hz – 20kHz ± 3dB on reference axis		Cut-out size Without pre mount frame: Height: 330mm Width: 245mm
<b>Sensitivity</b>	88dB spl (2.83V, 1m)		Cut-out size With pre mount frame: Height: 346mm Width: 257mm
<b>Nominal impedance</b>	8		Min depth required: 102mm
<b>Power handling</b>	20W - 150W into 8 ohm on unclipped programme	<b>Finishes</b>	Semi-matt white suitable for customising or pre-painting
		<b>Pre Mount Frame</b>	PMK8 (optional)
